The Farmer's Mutual Insurance Co. is advancing rapidly, and notwithstanding the company has only been in operation for a few months, it has already taken risks amounting to between \$400,000 and \$500,000, and its volume of business is rapidly increasing. The company is assured of success and will be of much mutual interest to our farmers.

A petrified body, perfect in its preservation, was exhumed Sunday near Bucyrus. Relatives desired to remove the body of Eli Beach, who had been buried for the past 11 years. When the grave was opened the remarkable discovery was made that the body was petrified, and it took eight strong men to lift it. Mr. Beach was engaged in the saloon business and weighed 300 pounds when alive. The body was in a remarkable good state of preservation, the features being almost as natural as life. A very peculiar circumstance was that the right foot was broken off, it being a mystery how it happened.

Appropos of the watermelon season the Baltimore American falls into the following rhapsodical vein: "Eating watermelons is an art, learned only by experience. It is a desert life, not a success. It falls too heavy on a dinner. Like a pretty girl, it is best by itself; it loses half its charm by being mixed in a crowd. The melon should be cold. It should be ripe. Its flesh should bluish like a graduate. Its leathery rind glow like a sunset. It should be eaten at noon, and its temperature should be as chilly as the smile of a Boston belle. When you get such a treasure, do not bother with other food. Open it, gaze on it, bury your face in its sweetness, and let your appreciation run riot."

Some uneasiness is felt by residents and land-owners of Put-in-Bay, Kelley's Island and Catawba Island over the attempt of the heirs of a man named Williamson, who's said to have been the original owner of those islands, to sell the islands to the Williams heirs living in Ohio and California and they have employed Col. Robert G. Ingersoll and other eminent attorneys to push their claim. It has developed that Col. Ingersoll is in Washington looking up the original title to the islands, and that in his opinion, will enable the heirs to establish their claim. In addition to the claims of the Williams heirs to the islands, they aver that they own a goodly portion of the city of Fremont. Henry county may have some of the Williams heirs.

One of the public schools in Kingston, N. Y., has undertaken to inculcate the most practical kind of lessons in thrift and frugality among its pupils, lessons which can not help but prove useful in the pupil's future life. The system which is now being carried out consists of a modified savings bank for the children. It has been in operation for about eight years and though the school is located in a district where all the residents are in moderate circumstances, the ward is probably the poorest in the city, some \$250 have been laid up. Some of the little fellows have savings amounting to as high as \$100. Each Monday the teacher receives the deposits and these are placed in a local savings bank and begin to draw interest as soon as the account reaches the sum of \$5. Practical lessons in economy, or plan to have something saved for a rainy day, are not likely to be lost on the young. The Kingston system, it seems to us, might be imitated with profit in very many schools of Ohio.

Mr. Isaac Horner, proprietor of the Burton House, Burton, W. V., and one of the most widely known men in the state was cured of rheumatism after three years of suffering. He says: "I have then said that I was of a language to convey any idea of what I suffered; my physicians told me that nothing could be done for me, my friends were fully convinced that nothing but death would relieve me of my suffering. In June, 1894, Mr. Horner then said that he was cured of his rheumatism by using Chamberlain's Pain Balm. At this time my foot and limb were swollen to more than double their normal size and it seemed to me my leg would burst, but soon after I began using the Pain Balm the swelling began to decrease, the pain to leave, and now I consider that I am entirely cured.
